YAMAHA

Improve your Home Theatre

Check out these new kids on the block (well, at least on our shelves)! These AV Receivers, some sporting a new look, all exude that Yamaha class and quality we crave for our home entertainment system. Packed full of features, they're tipped to be snapped up real fast, so check them out now!

Score yourself a bonus XBOX!

Search "XBOX" on our website for more details.

- 7.2Ch with Virtual Surround rear speaker
- Rated Output Power: 100W (8Ω, 0.06% THD) (20Hz-20kHz, 2Ch driven)

OUR COVID-19 UPDATE

We're fully committed to ensuring the ongoing health and safety, not just of our team, but for you, your friends and families too. To that end, we're making a few operational changes:

SHOWROOM IS CLOSED!

FOR GENERAL BROWSING & PICK UPS

- Even though our West Melbourne store is shut to the public it's business as usual for online, phone and email orders. We'll still have a team on hand to answer phones, pick, pack & get orders ready for delivery.
- We are now able to offer contactless Click & Collect, where your orders can be ready in approximately 2 hours.

For all updates and details, visit **www.radioparts.com.au/covid-19**
Stay healthy, and don't hesitate to contact us for any more information.

INDUSTRY NEWS

- In an AV world starved of stock, Yamaha have started landing some of their new models. Featured on this newsletter's cover, the RXV4A (replacing the RXV485) and RXV6A (replacing the RXV685) are up on our website now, and apart from the polarising new looks, sport a whole range of updated HDMI & audio features. For the other models in the range, you're looking at the end of 2020, if not 2021.

- Bowers & Wilkins are celebrating 25 years of their 600 Series with some special Anniversary Editions. We're unabashed fans of the 600 Series' sound, and they've managed to tweak the tweeter and upgraded the crossover to make them sound even better! Now you've got new colour options in Oak and Red Cherry to add to the Black and White, along with some discreet markings to indicate the Anniversary Editions. Lovely things, and arriving very soon.

- The Connected Home+Business awards for 2020 are being announced (almost as I write this) and a huge number of brands we stock are being awarded! We'll put a full list together soon for our website and social media, and our congratulations to all the winners! To check out the awards for yourself, visit: https://connectedmag.com.au/connected-home-50-most-popular-awards/

2 HOUR CLICK & COLLECT NOW AVAILABLE AT RADIO PARTS

Even though our showroom is closed for public access, we are allowing for 100% contactless click and collect at our West Melbourne car park between 9am and 5pm Monday to Friday.

To use this option, please follow these instructions:

Place your order online as usual and during checkout, select **Click & Collect** as your freight option and complete your order.

Wait for "your pick up is ready" email or SMS before you travel to us in West Melbourne.

THIS STEP IS VERY IMPORTANT: You must receive either an SMS or email notifying you that your order is ready for collection BEFORE making your way to us.

Follow the signs in our car park (located at 562 Spencer St, West Melbourne) that will give you a number to call. Have your order number ready to quote!

One of our team members will bring out your order directly to your vehicle!

PLEASE NOTE: We ask for your cooperation when complying with these Click & Collect instructions. We understand there may be some inconvenience, but greatly appreciate your efforts in helping us keep this Click & Collect option viable.

We also have a solution to deliver those large 50"+ TVs directly to your door!

With our showroom closed and restrictions hindering movement, it can be tricky to pick-up/deliver a big screen TV to residential addresses. But never fear! Utilising a Melbourne courier service, we can now organise to have your large screen shipped directly to your door! Simply visit **www.radioparts.com.au/news#news/radioparts-news/large-tv-delivery/** or call us on **1800 337 366** for more details.

REFURBISHED

EACH MONTH ONE OF OUR SALES REPS RECOMMENDS THEIR FAVOURITE PRODUCTS. **DARREN ROWLANDS' PICK**

REPS' CORNER

COVID-19 lockdowns have been very tough on all of us this year and if you are like me, you have had to work from home a lot more than before. Add that to the daily dilemma of do I wear trackies or jeans today, should I have a wine tonight and how do I get better phone reception at home?

Well I can't help you with the trackies or jeans decision but we can help with better phone coverage.

If you're the installer tasked with fixing rubbish phone signals or mobile broadband issues, how do you know exactly how bad it is? You could rock up, wave your phone around and have a look at the bars. Or, you could look like a professional and use the ETM770 signal strength meter to get a better understanding of what's going on.

Knowing where the strongest signal is coming from, how strong that signal is, as well as testing your chosen solution afterwards, this is a brilliant piece of equipment. With a built-in rechargeable battery, a removable antenna and ability to check 2G/3G and 4G coverage bands, along with a nifty hard case and charger, it's all ready for work.

If you're installing any kind of mobile booster (like the Cel-Fi range) or external antennas for a client's mobile broadband device, then you need one of these.

PLEASE NOTE:

Q: Do I need a SIM card to use this device?

A: Yes, but you'll only need an active SIM card if you want to check an IP connection between the network provider and SIM.

If all you want to do is measure signal strength, you'll just need an inactive SIM card; like a pre-paid SIM that's expired, a pre-paid SIM starter kit or any older full-size SIM that isn't active.
