Providing AV Solutions

## HIERARCHY OF CONNECTORS

Solves the struggle in finding a particular cable or wall plate. Quite simply, if one end of the lead, or one input or output of a device, ranks higher in the hierarchy of connectors, then you will find that cable or wall plate in that section.

Eg. 1 If you are looking for a DVI to HDMI lead, then you will find it in the HDMI section as HDMI ranks higher than DVI on the hierarchy.

Eg. 2 If a wall plate has a USB and Component connections, then it will be located in the USB category as USB is further up the hierarchy.

HDMI OVER IP

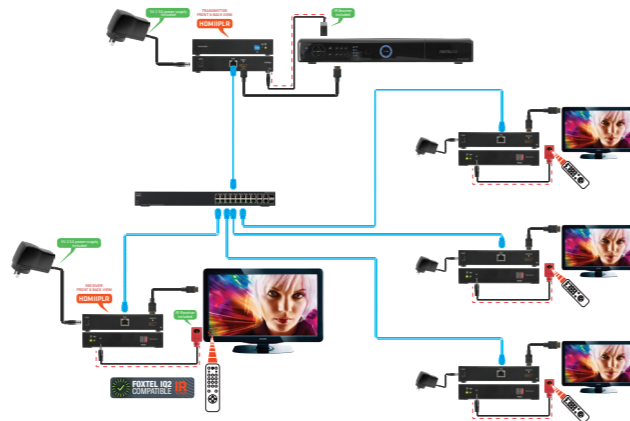

Send HDMI signal with Deep Colour support over a gigabit IP network (CAT6)

- A matrix system with up to 16 transmitters and 200 receivers can be created using a gigabit switch
- A transmitter/receiver pair can connect directly
- Send 1080p/60 resolution up to 100m/330ft
- IR pass-through for control of source device (38-56kHz)
- LED display on receiver shows what source is selected

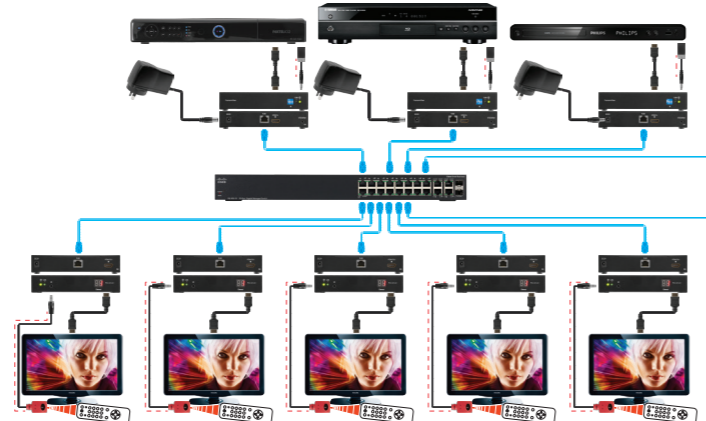

ONE-TO-ONE

ONE-TO-MANY

MANY-TO-MANY

|                 |          |              |                                |

| <b>HDMIPLR</b>  | 07351012 | Tx / Rx Pair | HDMI OVER IP CAT6 EXTENDER KIT |
| <b>HDMIPLRS</b> | 07351013 | Rx Only      | SPARE RECEIVER FOR HDMIPLR     |

4-ZONE HDMI OVER UTP EXTENDER

Distributes a single HDMI input signal to four identical UTP outputs

- Transmit over 50m single Cat5e/6
- Supports 3D formats and 30/36bit Deep Colour

|                    |          |                    |                               |

| <b>NEW H4RX4</b>   | 64510116 | Receiver only (Rx) | RECEIVER FOR H4SPC5B SPLITTER |

HDMI OVER CAT6

- Each set includes one transmitter and one receiver
- Connect with single Cat5e/6 cable to achieve a longer distance than HDMI cables alone
- Auto adjustment of feedback, equalization and gain
- With infrared signal return
- Compatible with 3D formats

|             |          |                            |
|-------------|----------|----------------------------|
| <b>HDC6</b> | 07351036 | HDMI EXTENDER OVER CAT5E/6 |
|-------------|----------|----------------------------|

HDMI OVER DUAL-CAT6

These HDMI extenders include two units: transmitter & receiver. The Transmitter is used to capture the input HDMI signals and carries

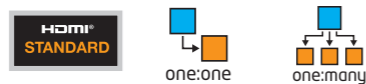

the signals through two RJ-45 connectors into two low cost CAT-5e or CAT6 cables.

- Use CAT-5E or CAT6 cable to substitute HDMI cable to achieve long distance transmission
- Cable skew adjustable equalization with 8 levels
- HDCP compliant
- Video bandwidth: 2.25 Gbps

|               |          |                 |                              |

| <b>HDMIC6</b> | 07351020 | 1080p up to 45m | HDMI OVER DUAL CAT6 EXTENDER |
|---------------|----------|-----------------|------------------------------|

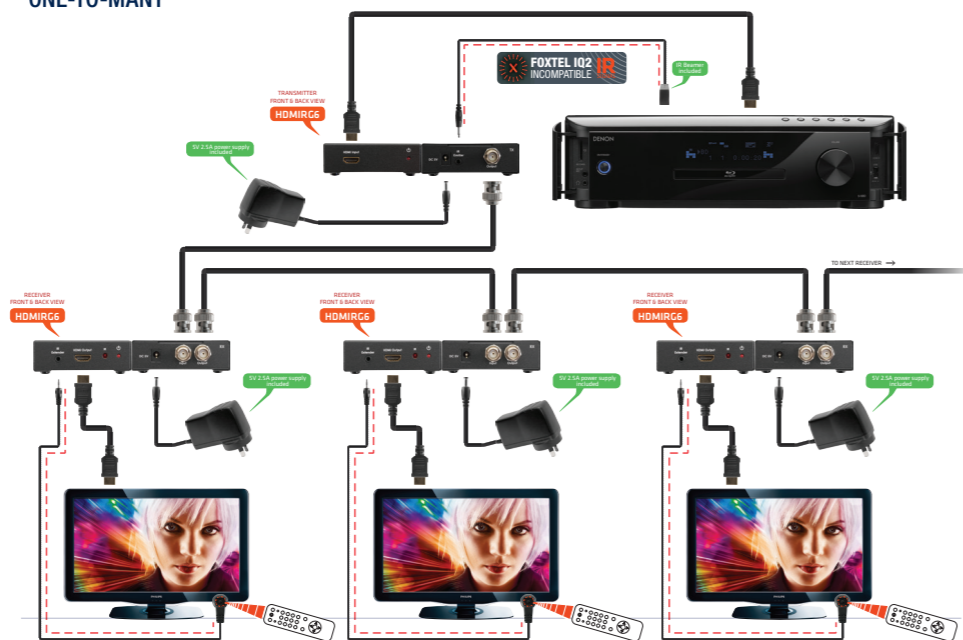

## HDMI OVER RG6

The HDMIRG6 HDMI over coax extender will send 1080p@60Hz HDMI signal with Deep Colour

- HDCP Compliant
- Distribute HD signals in 720p / 1080i / 1080p using a single coaxial cable
- 1080p resolution up to 120m (400ft)
- Create a transmitter/receiver cascade using signal loop-out to extend distance and build up a HDMI splitter system
- High quality metal chassis

### ONE-TO-MANY

## HDMI OVER FIBRE

- Extends 1080p HDMI signals up to 20km over optic fibre
- Provides high-resolution image quality
- Ethernet Pass-Through
- Plug-and-play operation—no programming or setup required
- Optical fibre rules out any RF interference
- HDCP Compliant

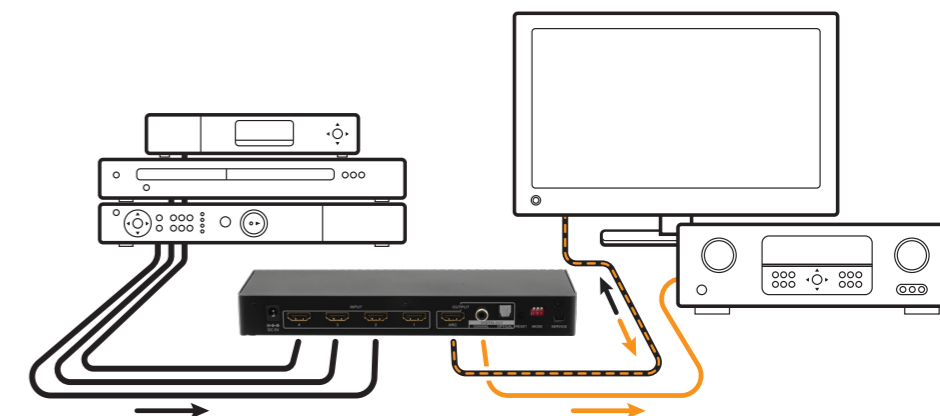

|                    |          |                          |  |

## HDMI SELECTOR WITH ARC

Add extra HDMI Inputs to your TV without having to upgrade your entire system!

- Audio Channel return function outputs audio from your TV so you don't have to change inputs on your Receiver/Amplifier
- 3D formats supported
- Supports digital coaxial+optical audio output for non-HDMI sound system
- Supports 1080P Deep Colour

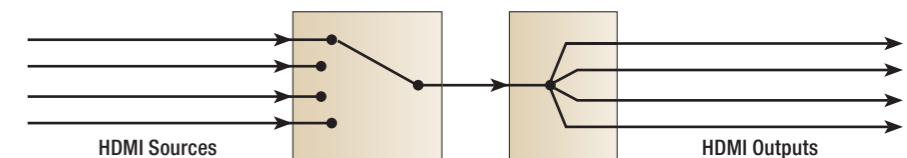

|                 |          |                               |
|-----------------|----------|-------------------------------|
| <b>HDMI4AVR</b> | 64538014 | 4-WAY HDMI SWITCH WITH ARC+3D |
|-----------------|----------|-------------------------------|

## HDMI SWITCHER/SPLITTER COMBO

Switches between 4x 3D HDMI inputs and splits simultaneously to 4x 3D HDMI outputs.

- Displays the selected input on up to 4 displays simultaneously
- Supports 3D video formats
- Use panel buttons or remote controller to select input signal

|               |          |                          |
|---------------|----------|--------------------------|
| <b>HDMI44</b> | 64510325 | 4-IN 4-OUT HDMI SPLITTER |
|---------------|----------|--------------------------|

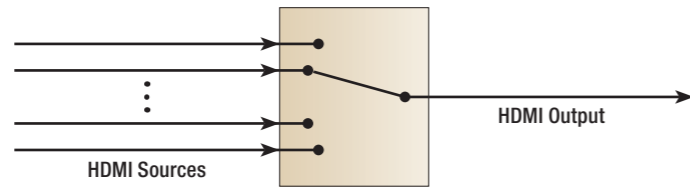

HDMI SELECTORS

Connects up to three or five HDMI sources to one HDMI display device.

- Maintains 480p, 720p, 1080i and 1080p video formats
- Supports 3D & HDCP
- Maintains highest HDMI single link video resolution and digital audio signal
- No power supply required for short HDMI runs!

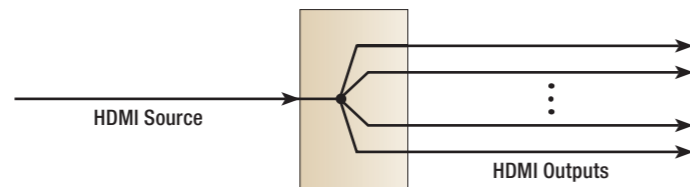

|  |                |          |       |                                 |

|  | <b>HDMI16SP</b> | 64510040 | 16-way | 16-WAY HDMI SPLITTER |

HDMI MATRIX SWITCHER

True matrix set-ups allow any source—Blu-ray player, satellite receiver, HD game consoles etc—to be shown on any display connected. For example, you can switch to your Pay TV box on your kitchen TV while the kids are simultaneously playing a Blu-ray movie on the bedroom TV. You can also view the same source on more than one display!

## HDMI CONVERTERS

### AUTOMATIC SWITCHER/CONVERTER

Automatically switches to the most recently connected input, and converts it to HDMI. This makes it ideal for conference rooms and presentation

- Auto source detection
- Resolutions to 1080p
- Four inputs: PC (VGA + 3.5mm Stereo audio), Composite AV, HDMI and Mini DisplayPort

**NEW VCDP4H** 64550107 4-INPUT TO HDMI AUTO-SWITCHER/CONVERTER

### HDMI UPSCALER

**4K ULTRAHD** Deep Colour x.v.Colour

If your 4K TV manufacturer skimped on the built-in scaling chipset, then your hi-res panel is going to waste! Take full advantage of your 4K panel and use the SC4K2K to do the upscaling for you!

- 1080p to 4K HDMI scaler
- 4x user selectable operating modes
- 3D 1080P pass-through modes
- Audio extraction via TOSLINK/optical socket
- Full CEC pass-through

**NEW SC4K2K** 64550115 1080P FULL HD TO 4K SCALER

### USB TO HDMI ADAPTOR

Add up to 6 extra monitors or displays to your computer or add an HDMI (with audio) link between your computer and your home entertainment system

- Supports HDMI Audio
- Supports up to 1080p output
- USB 2.0 Powered; Ultra Low Power
- Completely silent operation
- Uses a virtual driver

**USB2HDMI** 30251948 USB TO HDMI ADAPTOR

## HDMI LEADS

### DESIGNER SERIES

- Only 3.2mm diameter
- 1080P and 4K Ultra HD Compatible
- Advanced 7.1CH Surround Sound
- Full featured HDMI Audio Return Channel (ARC) and Consumer Electronics Control (CEC)

CONTRACTOR SERIES HDMI LEADS

At Pro.2, we pride ourselves on providing quality products with good value for money. When it comes to HDMI leads, you want to be sure you are getting the very best, without over paying for features that you don't need, and at the end of the day, don't really make a difference. Our Contractor Series HDMI Leads all have their test results online so you can see how they perform and conform!

## MHL ADAPTOR

Connect your MHL (Mobile High-Definition Link) enabled mobile device to your big

- Supports HD audio and video connectivity
- HDMI output resolution support: up to 1080p @ 24/30Hz

screen's HDMI input while a secondary micro-USB / MHL port enables charging!

- Comes with MHL-to-MHL (Micro-USB to Micro-USB) lead
- Requires device to support 5-pin MHL output

|                 |          |                     |

## IPAD ADAPTOR

The Pro2 IPDHDMI2 allows you to mirror whatever is on your iPad screen—slideshows,

- Send audio & video from iPad to TV/HDTV
- HDMI output with up to 1080p Full HD resolution
- Import photos to your iPad from your digital camera or USB flash disk
- Sync data & charge through a Micro USB data cable (extendable USB cable included)

presentations, websites and more—on any TV

- Supports PC keyboard input
- AV cable output enables you to watch videos, movies and photo slideshows on your regular TV (3.5mm to RCA AV cable included)
- No external power required

|                     |          |                               |

## DVI ADAPTORS

### DISPLAYPORT LEADS

The Mini DisplayPort is a miniaturized version of the DisplayPort interface. It is used in revisions of the MacBook, MacBook Air, and MacBook Pro notebooks, iMac, Mac Mini, and Mac Pro

desktops, Xserve servers, and 24-inch Apple Cinema Display. Also in Toshiba Satellite Pro S500, Tecra M11, A11, S11, HP Envy 14 and 17 notebooks.

- Nickel plated plugs
- Colour: White
- RoHS compliant

| Length | Part No. | SKU      | Description                         |

| 2M     | LC6216   | 27726216 | DISPLAYPORT PLUG TO PLUG LEAD       |

### MINI DISPLAYPORT

Commonly associated with Post-2008 Apple computers, Mini DisplayPorts replaced the previously fitted Mini-DVI ports. Mini DisplayPort is capable of driving resolutions up to 2560x1600 commonly used by 30" monitors. The Mini DisplayPort connector has recently been adopted by the

new Thunderbolt protocol and is still backwards compatible with Mini DisplayPort. However Mini DisplayPort adaptors and cables cannot be used for Thunderbolt purposes since active cabling technology is used to enable the high 10Gbps data rates.

### DISPLAYPORT ADAPTORS

DisplayPort is a digital display interface standard put forth by the Video Electronics Standards Association (VESA) since 2006. It defines a royalty-free,

digital audio/video interconnect, intended to be used primarily between a computer and its display monitor, or a computer and a home-theatre system.

- DisplayPort 20pin plug to VGA 15pin socket
- Nickel plated plug
- RoHS compliant

TOSLINK: "CONSUMER OPTICAL FIBRE"

TOSLINK (or optical digital) inputs and outputs are found on the back of most consumer AV equipment such as CD players, DVD players, and AV receivers. They allow the transport of high bit-rate digital audio (including multi-channel audio) over a single lead. Although utilizing an identical digital signal as S/PDIF coaxial digital connections, TOSLINK uses light instead of electricity making it inherently impervious to EMI.

Often referred to as "fibre optic" cable, it is more accurately called TOSLINK (from Toshiba Link), setting it apart from other optic fibre technologies and connections—most notably "fibre patch leads" which are commonly used in high-speed computer networking infrastructure, TV broadcast equipment and telecommunications, and which use vastly different connectors.

PREMIUM TOSLINK LEAD

- High grade optical cable for audio
- Double protected, super flexible cable
- Overall Diameter: 6.0mm

2:4 VGA MATRIX

Perfect for bars, club houses, and function spaces; distribute two PC sources up to four different zones independently!

- Two PC inputs with 'PC On' indicator
- Four outputs/zones each feature source selector switch with indication LED
- Boosts signals for transmission up to 65m for VGA and 100m for Audio
- 2x VGA inputs / 4x VGA outputs
- 2x Audio Inputs / 4x Audio outputs (3.5mm Stereo Jack)

— Video (VGA)  
— Audio (3.5mm Stereo)

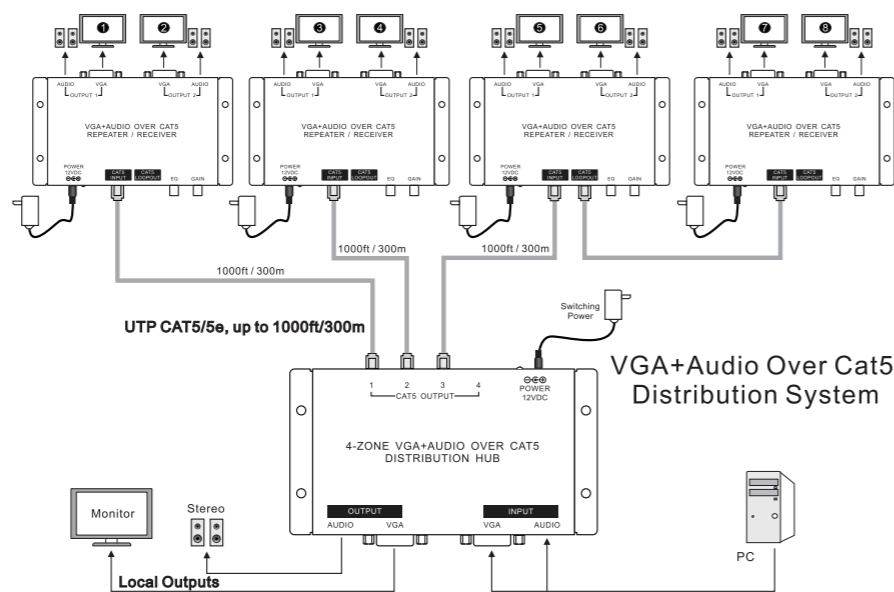

**NEW** PRO1338 00760652

2-IN 4-OUT VGA + AUDIO MATRIX

4-ZONE VGA OVER UTP EXTENDER

- Distribute a VGA+Audio signal via single UTP CAT5/5e to up to 4 zones (8 outputs)
- Transmission Distance up to 300m (1000ft) via UTP CAT5/5e
- With the loop-out function on the receiver, it can be set up more than just 4 zones.
- Provides 4x RJ45 outputs for transmission

SPARE/EXTRA RECEIVER FOR PRO1270

4-WAY VGA SPLITTER

- Video Bandwidth: >500MHz
- Supported Resolutions: VGA, SVGA, XGA, SXGA, UXGA, QXGA, WUXGA, WQXGA
- Gain and EQ Adjustments
- Input/Output Connector: HD-15 Female

PRO1296 00760650

4-WAY VGA + PC AUDIO SPLITTER

PREMIUM VGA LEADS

This super VGA lead is known as the best in the industry as the 3 Coax + 9 wiring plug configuration, which can minimise the quality

loss over long distances, plus two ferrite filters at both ends to reduce interference.

- 3 Coax + 9 wiring configuration
- Ferrite filters at both ends
- Ø8.5mm outer diameter (AWG28)
- Black dentate cable with PVC jacket
- HD15 plug to HD15 plug

4-PORT USB EXTENDER HUB

The PRO1354 extends a USB connection up to 50m using CAT5e/6 cable. Each extender consists of a local unit that connects to a computer, and a remote unit that connects to up to four USB devices

- Supports USB transmission speeds up to 480 Mbps
- Built-in 4-port Hub on receiver unit
- Link indicator on receiver unit
- Power Supply: 5VDC/3A (included)

4-PORT HUB

- 4 ports, and power up to 500mA each port
- Active or Passive operation—power input for optional external power supply
- No need for drivers or software
- USB Version 2.0

**HUB4** 09050715 4-PORT USB 2.0 HUB

USB / TOSLINK / S/PDIF DAC

The converter takes a Toslink (optical), SPDIF (coaxial) or USB digital audio source and converts it to standard analogue left and right stereo audio.

- Inputs: USB / Toslink optical / SPDIF coaxial (Switchable)
- Built-in amp with volume control
- Outputs: left and right stereo audio RCA and 3.5mm stereo headphone jack
- Plug and play—requires no additional drivers or software

USB ETHERNET ADAPTORS

If your PC or Netbook does not have an Ethernet port, but you need the reliability or speed of a wired network connection, then the Pro.2 USB Ethernet adaptors are convenient and compact solutions. Supported by most computers (and operating systems) without installation of special drivers, they are a quick and simple way of joining a LAN to gain internet access, print via network printers, stream media, and access shared files.

OUR CABLES PASS THE TEST

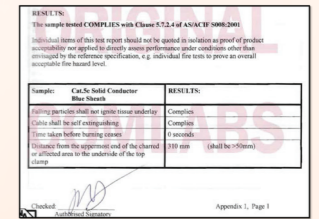

PRO2 CAT6 CABLES PASS THE FLUKE LINKWARE CABLE TEST MANAGEMENT PERFORMANCE TESTS, OUT-PERFORMING THE BIG BRANDS!

RUBBER STAMPS

Test reports for the Pro2 range of data cables confirm that ACA and A-Tick standards are exceeded with testing for aspects like flammability and performance.

FLAMMABILITY TESTS

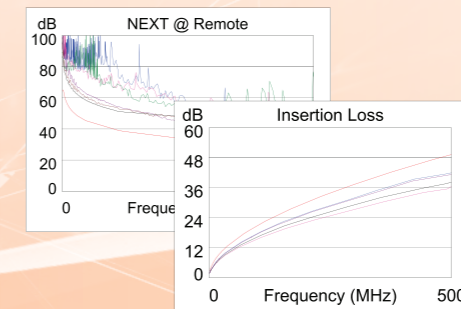

By using higher grade PVC jackets, our cables breeze through tests. As shown above, Comlabs couldn't even ignite the our CAT5e cable, meaning testing for flammability was never going to be an issue.

NOISE LEVELS AND INSERTION LOSS

Test reports from the Fluke DTX1800 confirm amazing performance levels from Pro2 data cables.

Test Summary: PASS

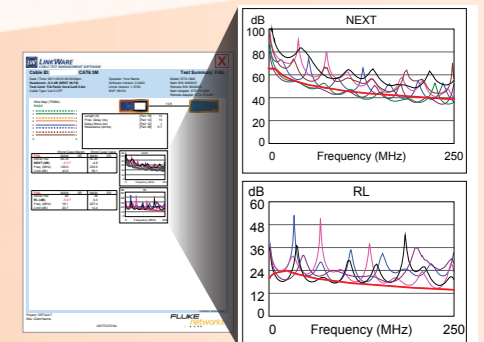

The above reading indicates just how comfortably the Pro2 CAT6A cables exceed TIA standards. The noise levels (NEXT) are far better than industry requirements, exceeding them by over 10 dB at some frequencies (that's over 3 times better!). Likewise for insertion loss (or attenuation) meaning better integrity over large cable runs.

OUR COMPETITORS' PERFORMANCE

They also show that some of the leading competitors have some "catching up" to do.

Test Summary: Fail

Our two leading competitors didn't fair so well with both suffering for high noise levels. One of the competitors also failed with regard to return loss—indicating poor terminations. All this poor cabling puts a strain on the network.

CAT6 PATCH LEADS

CAT6 Patch Leads with molded strain relief. Features RJ45 plug-to-plug connectors and supplied fitted with flush injection moulded cable boots to prevent flaring of cables.

- Quality cable material
- Molded strain relief
- Low profile flush moulded boots
- Available Colours: Black, Blue, Green, White & Yellow

CAT6A PATCH LEADS

CAT6A cables have been designed to operate up to 10Gbps speeds, 10x better than CAT6 cables

- Features RJ45 plug-to-plug connectors
- Quality cable material
- Molded strain relief
- Low profile flush moulded boots
- Colour: Blue

| Length | Part No. | SKU      | Colour | Description      |

CAT6 CROSSOVER LEAD

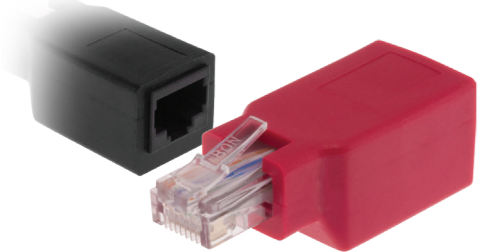

CAT6 Cross-over Leads with molded strain relief. Features RJ45 male-to-male connectors

- Stranded copper conductors for flexibility
- Molded strain relief & Low profile flush moulded boots
- Packaged in heat-sealed hang-sell bags.
- Colour: Black/Yellow

|     |        |          |              |                     |

PRO2 RG59 & RG6 FLY LEADS

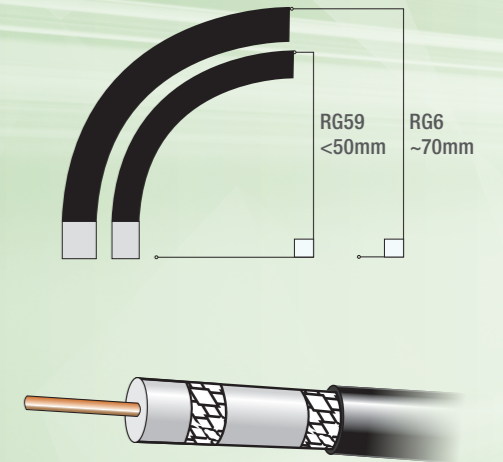

All Pro2 Fly Leads are made from quality Quad Shielded cable so that your signals' integrity stays intact!

FLEXIBLE RG59

- RG59 is generally preferred for fly-leads due to greater flexibility over RG6.
- However, RG6 is preferred when hooking up cable or satellite TV and other broadband uses due to its performance at higher frequencies

HIGH-QUALITY QUAD SHIELDING

- Quad Shielding shields signals from noise created by equipment & power cables. Digital signals are more susceptible to the negative impact of "noise" making Quad Shielding even more essential.

3-CHANNEL MIC MIXER

FRONT

REAR

The PRO2 3 Channel Microphone Mixer will mix 3 microphones with audio input, and control the volume of 3 microphones and Aux output independently. It offers simplicity and routing

flexibility in a convenient, compact, and rugged enclosure. Enhance your vocal experience with separate microphone volume levels, tone control.

- Separate audio input level control
- 4x Independent volume controls
- Passive mixer—no power required

- 3x unbalanced 6.3mm mono jacks & 2x RCA stereo aux input

GROUND-LOOP ISOLATOR

The PRO1059 will solve the problem of ground loop issues and easily connects in any audio system!

- Frequency range: 10~20,000 Hz
- Insertion loss: 1dB @ 1kHz
- Connection: RCA Sockets to RCA Plugs
- Channel separation: 45dB @ 1kHz minimum

**NEW** **PRO1059** 40451285 RCA GROUND LOOP ISOLATOR

RCA PUSH-PIN ADAPTOR

- Saves time and the trouble of soldering your connections
- Use the press terminals to have a firm and reliable connection in seconds!
- Sold individually—single plug only

# MULTIROOM SPEAKERS IPHONE / IPAD MISCELLANEOUS

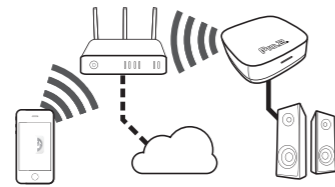

WI-FI MUSIC RECEIVER

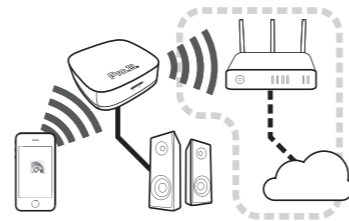

The Pro.2 WMR14 AirPlay and DLNA Music Receiver brings your Hi-Fi System the flexibility of Apple AirPlay and, industry standard, DLNA.

- Connects to your existing home or office Wi-Fi
- Alternatively creates its own hot-spot, allowing up to 10 devices to connect to it at a time
- Supports Wi-Fi 802.11b/g/n
- Apple AirPlay support for iOS devices
- DLNA/UPnP support for Windows Media Player and Android Apps
- Digital and analogue outputs
- Supports multiple units on the same network

CLIENT / PEER

DIRECT / BRIDGE

**NEW WMR14** 39894390

WI-FI MUSIC RECEIVER

BLUETOOTH RECEIVER

Lose the wires without compromising audio quality or having to upgrade your audio system!

- Incorporates the Apt-X codec for exceptionally high CD quality wireless performance
- Dual simultaneous digital & analogue output
- S/PDIF Optical output
- 3.5mm analogue stereo output
- Low 70ms latency
- Low SNR: >100dB
- High level output: 2Vrms

**BMR3X** 39894385

BLUETOOTH MUSIC RECEIVER

STEREO LINE PREAMP

This audio pre-amp is great for audio distribution systems where sources may have different output levels. Adjust the pre-amp gain so

your source is matched with the others before entering your distribution or zone amps!

- Frequency Response: 20Hz to 20kHz
- Gain Control: 0-15dB
- S/N Ratio: >85 dB

**PRO1327** 60850430

STEREO AUDIO LINE PREAMP

PHONO PREAMP

In order to connect your turntable to the line-level inputs most amplifiers have (Aux, Tape,

Line, Video, CD, etc.), you need to first pass the signal through an external preamp.

- Ultra compact design
- Use either 9V Battery or 9V / 100mA Power supply (not included)
- Simply plug and play
- Current consumption: 1mA (average)
- Amplification: 34dB

**PA005** 60850410

INLINE PHONO PREAMP

HEADPHONE AMP

Perfect for headphone displays in stores or create your own Silent Cinema room at home! Connect up to four sets of headphones, each with individual volume controls.

## STEREO AMPLIFIER

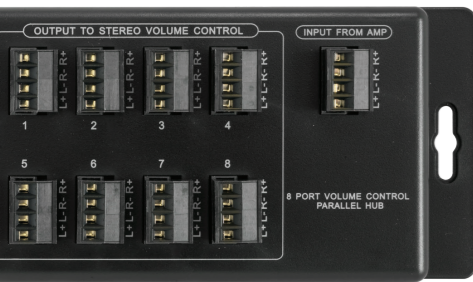

## MULTI-SPEAKER INSTALLATION CONSIDERATIONS

- When installing multiple speakers to an amplifier output, it's important to consider the following:
- To ensure optimal operation of your amplifier or receiver, you must show it a load that it can handle safely. This generally requires the use of impedance matching devices when connecting multiple speaker pairs
  - Calculate the impedance matching settings
  - Total speaker wattage must be within the amplifier's power output capacity
  - Always double check settings and test impedance is correct before connecting to your amplifier

| IMPEDANCE SEEN BY AMPLIFIER | SPEAKER IMPEDANCES |            |            | SPEAKER SELECTOR or VOLUME CONTROLLER SETTING |
|-----------------------------|--------------------|------------|------------|---|
|                             | 2Ω # PAIRS         | 4Ω # PAIRS | 8Ω # PAIRS |   |
| 4Ω                          | 2                  | 1          | -          | 1x  |
|                             | 4                  | 2          | 1          | 2x  |
|                             | 8                  | 4          | 2          | 4x  |
|                             | 16                 | 8          | 4          | 8x  |

BULL-NOSE WALL PLATES

These unique wall plates allow cables to enter the wall cavity space without the need for interconnect wall plates in between.

- Ideal for instances where you have pre-made leads directly out of the wall cavity.
- Bristle brush design prevents dust and bugs from entering from the wall cavity.

IR OVER COAXIAL

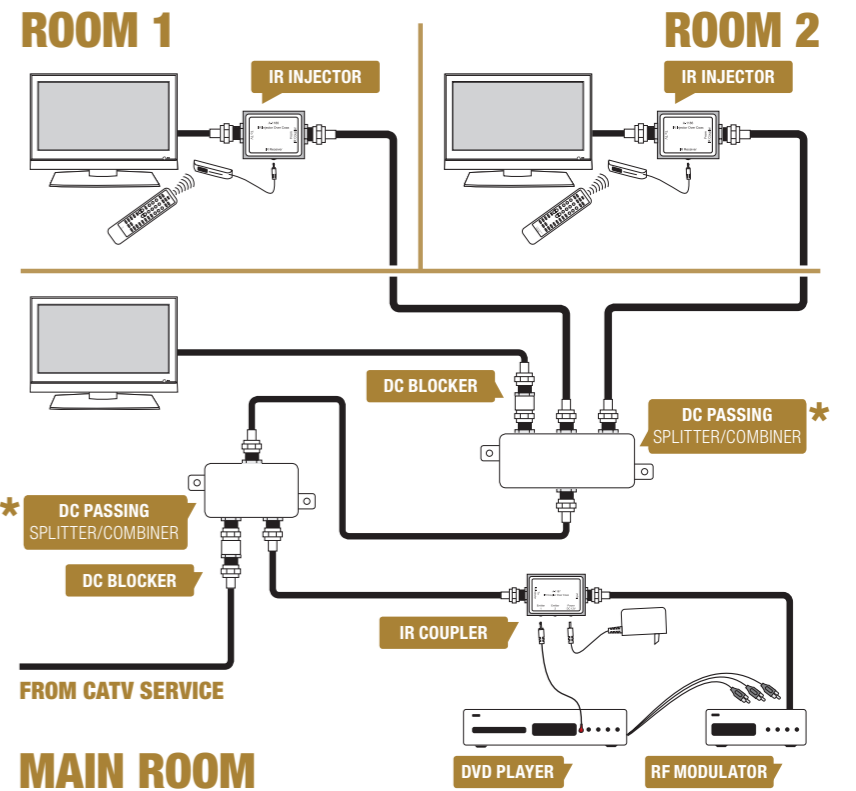

This kit allows IR signals to be inserted onto a coax cable in one location and extracted from coax on another location.

- Creates an IR system with existing wiring
- Quick and easy installation
- Powers up to 4x IR receivers with one power supply

BASIC

ADVANCED

\* DC and IR Passing Splitter/Combiners are required for this setup. Use of a Non-DC Passing Splitter will stop the IR System from working as any voltage leak from the TV affects the IR signal; DC blockers such as Resi-linx RLACC130 are perfect for this. We also recommend the use of **ChannelPlus** Splitter/combiners (models 2512 & 2514 have been tested and confirmed to work with this system). Confirm your Splitter/combiners support DC and IR passing before installation!
