- Connect up to three mobile devices (Android or iOS) to answer visitor calls on an Aiphone JP series colour video intercom system
- 12V DC power source supplied

**RSP INC
\$1,799**

ATMOS + MC AV RECEIVERS

Slim HDMI2.0 18Gbps

Yamaha have offered us an awesome deal on their biggest 3 AV receivers in their general range. Shhhh, but these models have many of the features of their more exclusive brethren, such as European tuning, a digital radio tuner and the same circuitry.

The differences between RXV & Aventure?

Warranty – straight 2 years versus an Aventure 4 year warranty with the first year being a replacement warranty

Chassis – Aventure has a centre leg and is super solid, hence why a RXA3070 weighs 1.5kg more than a RXV3083

The **RXV1083** is the cheapest audiophile AV receiver by Yamaha, featuring symmetrical layout. Great as a home theatre amp and also for listening to [2 channel] music.

The **RXV2083** is the cheapest 3 zone, 9ch in the Yamaha range.

The **RXV3083** is the flagship of the RXV range, capable of 9ch (11ch) with whopping, big capacitors, meaning far more dynamic power. Good for cannon blasts in movies!

RXV1083	01618774	7.2 CH
RXV2083	01618776	9.2 CH
RXV3083	01618778	9.2 CH
