

WHDMI2 WIRELESS HDMI AV SENDER KIT

Keep your messy and sometimes noisy HD video sources in another room or hidden away in a cabinet on the other side of your entertainment room, wirelessly connecting them in their Full HD glory to your TV or Projector. Easy plug-and-play system that requires no setup, no ugly cables, no loss of video or sound quality, no delay and so simple anyone can set it up!

The WHDMI2 Wireless HDMI AV Sender Kit consists of a wireless transmitter and receiver that work together to transmit HDMI video at distances of up to 20m. The kit supports 1080p resolution with less than 1ms latency for smooth video playback.

The compact transmitter is a great choice for sending HDMI sources to any one location without the hassle of wires. The device is completely plug-and-play, so there are no drivers or software to install.

The WHDMI2 Wireless HDMI AV Sender Kit uses WHDI™ technology so you can rest assured performance conforms to the new industry standard!

Features

What is WHDI?

One Standard, All Devices!

WHDI™ (Wireless Home Digital Interface) revolutionizes the home multimedia experience by wirelessly delivering interactive HD video.

The technology enables wireless delivery of uncompressed HDTV throughout the home with video rates of upto 1080p in the 5Ghz unlicensed band. It surpasses competitive technologies by providing outstanding and consistent picture quality equivalent to wired HDMI cable, low latency, multi-room availability and low power consumption.
