ADD INTEREST AND FUN TO YOUR EXERCISE & SPORTING ACTIVITIES

8GB WATERPROOF BLUETOOTH AQUA BUDS

- AQB18BLK | 08850018
- AQB18BLU | 08850015

These are one of only 2 IPX8 exercise headphones on the market today that you can confidently swim with! Since Bluetooth doesn't work under water, they have 8Gb memory on board. For land dwelling exercisers, you can sweat all over them and simply rinse them under running water to clean them. They also feature a new clip on power supply, making it more convenient and safer. Finally, the sound! They will continue the reputation of being the best sounding exercise headphones on the market thanks to their 9mm drivers.

1.9GHZ WIRELESS VIDEO INTERCOM

WL11 | 21810775

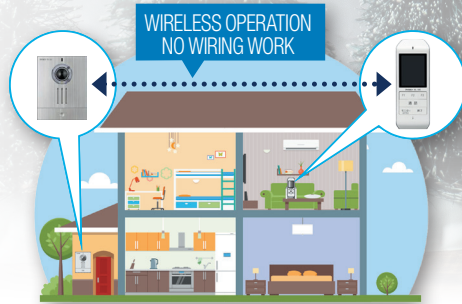

When we are talking about video or audio communication, we like items to be "hard wired" and not rely on wireless technology to maximise reliability. So when Aiphone, who are a leader in intercoms, releases a wireless video intercom then we know it's going to be good.

Using Dect wireless technology, which operates on 1.9Ghz range, it avoids interference from home appliances and other frequencies and will be more stable than other wireless platforms.

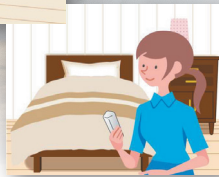

The door station requires 6x AA batteries but will last 2 to 3 years with an average of 6 to 10 calls a day. It has a portable master station that includes a charging cradle meaning you are guaranteed to never miss a visitor.

It also has a 100m unobstructed distance so within a normal household you could expect a distance of 50-70m that will suit most houses.

Get in quick and grab your stock for the Christmas period.

Answer calls from any room in the house

- Adjust the vertical viewing angle of the entrance camera up to 19°
- The compact, wireless Master station answers calls from any room. Fully rechargeable with large buttons
- Battery operated entrance station
- Stylish champagne silver colour Video Entrance Station suits every house

NOTE: WE STILL HAVE LIMITED STOCK OF THE AIPHONE JO SERIES INTERCOM AT THE PROMO PRICE WHICH HAS BEEN EXTENDED TO END OF DECEMBER

ZyCast

FOXTEL APPROVED SINGLE & QUAD HD MODULATORS

ZyCast, the manufacturer of "resi-linx", have developed 4 products aimed at the commercial AV distribution market. This range has been specifically designed for Foxtel live sports content and are the only HD Modulators approved by Foxtel.

While standard modulators will allocate around 12mbps to each stream, these new models are capable of a massive 24mbps throughput, meaning the picture quality on HD sports channels like Fox Footy is exceptional.

Models with delayed audio (KT-FX1DA and KT-FX4DA) allow the option of routing audio (eg. through a PA system) using stereo RCA connections. You are then able to easily adjust the delay in the audio signal for perfect lip-sync.

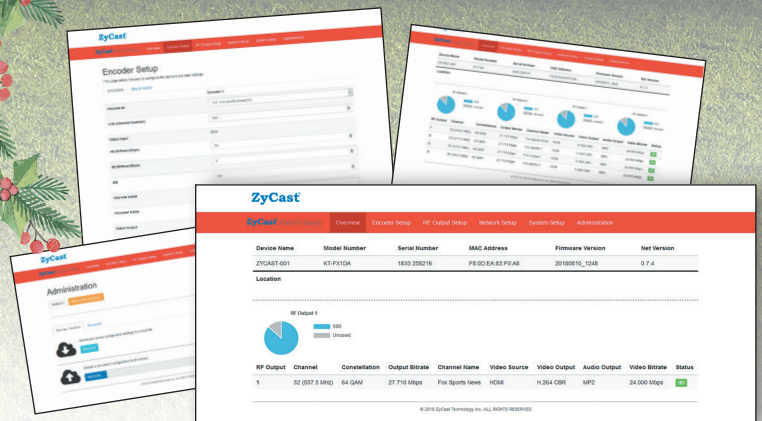

There are also many other features including redundant power supplies, SMT alarms and simplified programming. You also get local tech support and a factory 3 year warranty.

BUILD YOUR OWN CUSTOM WALL PLATES WITH PRO.2'S MW13 RANGE

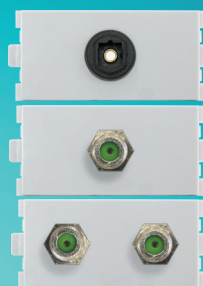

The Pro.2 modular wallplates are one of the most versatile ways to hide unsightly AV cables and leads. The problem now is that many installers need to run a 4K signal from a source to the TV. Despite our HDMI insert being our most popular to date, when sending an 18gbs signal there will be too much loss in the joins. So we have introduced the MW13BL11. This insert is designed to allow a continuous 4K HDMI lead to pass through a cleverly designed 11mm cut-out. This allows for any cable up to a gauge of AWG24 to run directly through the wall plate.

Simple snap-in modules, guarantee a perfect finish, each and every time.

CUSTOMER STORIES - MARION BAY CARAVAN PARK WI-FI

Many of us love to go camping. Enjoying the great outdoors and appreciating the natural splendour from the perfect camp site or at the wheel of a 4-wheel drive. It's even better now with modern conveniences, so if you have trouble setting up your new tent just YouTube the setup video and...

What?! No 4G!

Last month Radio Parts reps Darren and Ben put on their network thinking hats and helped Shane from Jims Antennas Gawler in South Australia to install the Wi-Fi for Marion Bay Caravan Park. The bush camp is a mix of cabins, powered and un-powered camp sites along with all the usual communal amenities. The initial obstacles were:

- No cabling possible between access points (AP)
- Many tall trees and no line-of-sight between access points
- Require minimalist system that is quick to install and simple to manage
- Outdoor installation with close proximity to the sea
- Needs to be easily expandable

Weighing up the various requirements for this installation brought American network giant Ubiquiti to mind. No matter how good the plan is there are always things you can only check on the ground with the hardware insitu. By choosing the UAP-AC-M-PRO we were able to provide huge coverage with only 5 access points and offer simple and secure WiFi management from a

Unifi Security Gateway connected to the parks office computer. Shane decided to take management to the next level and install a Unifi Controller Cloud Key that gives remote access to the parks Wi-Fi system for any remote management or problem fixing over the internet.

The whole project was a success with everyone enjoying a job well done and proving once again the effectiveness of not just the Radio Parts team but our experienced customers.

STRONGER. SAFER. FASTER.

Working with naked optical fiber is normally a pain in seating area. Shards of fiber trying to find your flesh, being very careful not to break it while pulling through a conduit, and then a fiddly process to terminate & confirm the termination. Cleerline's aim has been to break all three of those preconceptions. We've seen their fiber used in a tug-of-war while still being used to push 4K video. With over 200x the pull force of other fiber, and with a smaller glass-cladding layer, you're not going to need the bandages. This all leads to a faster and safer job, allowing you to work with fiber to enhance your client's experience without the worry.
