Introducing a new brand to our ranks, Monitor Audio! Exceptional when it comes to hidden speakers, they boast the power of high quality, high performance loudspeakers that serves every application, taste and budget.

British owned and managed, this global brand has been in the industry for over 40 years and have become the world's foremost expert in developing metal dome drivers. They are also responsible for developing the following technologies now available in the market: C-CAM Drivers, DCF (Dynamic Coupling Filter), Gold Dome C-CAM Tweeters, IDC (Inverted Dual Concentric) midrange/tweeter modules & Tri-Grip Dog Fixings.

Not only are Monitor Audio speakers built for excellent sound quality, they seamlessly and stylishly blend into their architectural surroundings.

– By Mike Swann

In the rarified air of Bowers (B&W) custom speakers, you have 4 levels. I'd describe them as the general purpose 3 series with the most versatile being the CCM362. Then you step up to the 6 series. The CCM664 in particular offers exceptional music reproduction. The 7 series are simply amazing, while the 8 series is, to be frank, too rich for our Radio Parts blood.

Due to stock shortages, we were offered a deal on the CCM7.5. This speaker, with its angled enclosure is ideal for side and rear channels of professional home theatres. They are also ideal for areas where sound needs to be directed outwards.

We're more than happy to pass on the discount, so contact us for a deal!

As a side note, we also received stock of their in-wall or in-ceiling subwoofer, the ISW3. A discrete and powerful sub that's the perfect match for a custom home theatre.

CLLOUD FOX

EACH MONTH ONE OF OUR SALES REPS RECOMMENDS THEIR FAVOURITE PRODUCTS.
FRANK MANICASTRI'S PICK

Hey guys. I'm Frank Manicastro. Based in the Central Coast, north of Sydney, I cover parts of NSW and QLD. I spend a good chunk of my time in the car and on my trusty Samsung phone. In a previous life, I was the national sales manager for Strong, selling set top boxes and media players. You could say that technology has been in my veins for most my work life.

I don't know about you guys, but if I'm ever travelling on a plane, I like to relax and even get some shut eye on those long hauls. Which can be hard to do with the drone of the engines or noisy passengers. So I was super excited to try out these noise cancelling headphones by Cloud Fox.

Literally, all I had to do is slip them on and flick a switch. And that's it. They worked a treat!

Cloud Fox is actually made in the same factory where Doss manufacture their Bluetooth speakers. Based on the reliability and stringent quality

control at this facility, I expect their noise cancelling headphones to also be one of the best in the market.

You get a full 8hrs of Active Noise Cancelling / music listening (up to 16hrs if ANC isn't switched on). In-line buttons on the side, so you don't have to pick up your phone to answer calls or change the track. And they're really comfy too. With a flexible headband and rotating earcups, they're easy to adjust and fold away neatly. Finally, being direct from the production line makes them extremely good value for money!

Thanks for tuning in guys and I hope you can experience the full range of Cloud Fox (by Doss) headphones yourselves!

YAMAHA

CONTROL TV AUDIO WITH THE POWER OF YOUR VOICE

ALL NEW

Soundbars with Alexa voice control.

– By Mike Swann

Yamaha have introduced their 2 new entry level soundbars, the YAS109 and YAS209. Like their predecessors, they will be cheap and convenient. The YAS109 is an all-in-one solution. The inbuilt subwoofer provides some low-end rumble, but it's aimed at augmenting TV sound. The YAS209 has the separate subwoofer and being a wireless sub, you can place it practically anywhere in the room for a real movie experience.

So? What's different with the new models?

The YAS109 and YAS209 feature Alexa voice control, though before you stop reading, hear me out!

SOUNDBAR

YAS109B | 01938681

RSP INC \$399

Even if you're not a fan of voice control, consider how you could use voice control on a soundbar. You can say, "Alexa, turn the volume up in the lounge room", which is a little enticing, but it's also smart enough to understand other terminology like increase volume or louder. If you take it a step further, you can quickly tell the soundbar to mute or use numbers. 0 is mute and 10 is max volume. You'll quickly understand how to control the volume, quicker than via a remote.

So, the other stuff?

They both have the 'must have' sound modes including DTS and Dolby for movies and Clear Voice for the news. They also have an Immersive 3D sound mode called DTS Virtual:X.

SOUNDBAR

With Wireless Sub

YAS209B | 01938711

RSP INC \$599

There's loads of connectivity, including the all-important HDMI ARC, so only one HDMI cable between the Yamaha and the TV.

Bluetooth Streaming services like Spotify Connect and Amazon Music (90d free trial), plus a free Sound Bar Controller App. Note that these baby Yamaha soundbars don't have MusicCast onboard. For that, consider the MusicCast BAR 400.

And yes, there's a remote, which can also be used to trigger Alexa.

Finally, they feature new designs that are thin enough to sit under the TV. And as always, trade pricing and "distributor" volume discounts apply!

TROUBLE SHOOTING ELECTRONICS?

Here's 4 product areas to consider:

– By Mike Swann

MULTIMETERS can do a bunch of things like check continuity, voltage, resistance and low level current, so let's check out a few options:

The DT830D costs peanuts, but with the voltage and conductivity feature, you can still check DC power supplies and cables.

DT830D

RSP INC
\$12.95

RSP INC
\$24.95

UT33A+ (Auto Ranging)

RSP INC
\$19.95

UT33D

You'll find Uni-T multimeters in thousands of Chinese factories due to the affordability and value. The UT33A+ is a touch more expensive than the UT33D as it has Auto-Ranging. That means that you have half as many settings. Just pick say 'DC voltage' and you see the range in volts or millivolts automatically.

RSP INC
\$69

UT139B

If you also need to check AC voltage from say an alarm panel power supply, then True RMS is a great feature. While a standard DMM will show a reading, a True RMS multimeter will be accurate.

The UT139B is a cheap and feature packed DMM.

Standard are also a big Chinese brand in the DMM market. The ST960BT has bluetooth, so you can use the data logging feature to isolate intermittent issues.

RSP INC
\$109

ST960BT

RSP INC
\$313.50

760-2

While the Chinese brands are very popular, global brands like Fluke, Kyoritsu and Testo generally offer greater accuracy and build quality. Testo is a global leader in measurement devices with the 760-2 being a great starting point for most professionals.

Radio Parts is one of the few **POWER SUPPLY** importers to have full Aussie approvals for both DC switchmode power supplies (SMPSs), AC plug pack power supplies as well as bench top power supplies.

AC1615

RSP INC
\$24.95

The AC1615 is commonly used to power security panels from brands like Ness and DAS.

RSP INC
\$39

Most Doss power supplies come with interchangeable DC tips.

SMPSs use a switching regulator to control the power conversion from AC to DC. SMPSs are popular as they are small, light and efficient, though for highly sensitive equipment, they tend to generate high-frequency noise.

RSP INC
\$239

HCS3102

big name brands in the field such as Meanwell and Manson. Manson, from HK, are very popular in the universities as well powering sensitive radio equipment.

SOLDERING STATIONS are usually for creating or repairing circuits, but again, there's a huge range of options.

Soldering stations start at the low cost ZD99. While most soldering irons convert AC to DC voltage and use microprocessors, the ZD99 is 'minimalist' with just a rotatory dial for temperature control.

RSP INC
\$29.95

ZD99

Step up to an AT938D by Atten and you'll get a more accurate digital display, a shorter tip on the pencil for more precise work and better construction.

RSP INC
\$109

AT938D

The Doss ZD917 features both a soldering iron and desoldering station. The microprocessor control and digital display makes it one of Australia's most popular choices for hobbyists.

RSP INC
\$249

ZD917

The Weller is still made in Australia and well suited to continuous production work.

RSP INC
\$259

WESD51DAU

RSP INC
\$550

WD1000

Zee Germans [sic] manufacture the high-end Wellers. They have special tips for low thermal loss, quick temperature recovery and the superior sensors for heat.

An **OSCILLOSCOPE** measures electrical signal over time, showing us such things as waveforms, noise, amplitude and frequency over time. You'll notice that more expensive oscilloscopes have better bandwidth (100MHz) and rise time (edge speeds).

We keep stocks of a couple of Uni-T oscilloscopes. There's the 25MHz Uni-T with 2 channels and a multi-coloured 8" LCD display. There's also the 100MHz Uni-T for more accurate readings.

RSP INC
\$309

UTD2025CL

So jump online and check out our wide range of electrical testing equipment and tools, or why not come in-store and see for yourself. Our friendly and experienced staff may be able to suggest a device or product that just might do the job! And as always, we have great trade prices for all our trade and account customers.

WANT TO KNOW MORE? 4TH OF OCTOBER Power and how to get it!

PRODUCT VIDEO AVAILABLE

Better your knowledge of products and solutions with our in-house info training!

The training session on Oct 4th will be based on this relevant topic, exploring the wide range of Power Supplies Radio Parts imports. From the domestic switched mode bricks all the way through to industrial-grade supplies.

But don't stress if you can't make it. You can check out this session and any many others by going to:

radioparts.com.au/training

PROTECT YOUR HOME WITH SMART HOME WI-FI CAMERAS

Want to be able to protect your home without having to break the bank? Then you need to have a look at these Kasa Smart security cameras by TP-Link! Designed to deliver clear 1080p video, you can access these Wi-Fi cameras live via the Kasa Smart App at any time, even on Alexa or Google Assistant supported displays!

KASA CAMS

Packed full of features, these stylish cameras make it easy to monitor your home and keeps you notified of any disturbances 24/7, regardless of where you are:

- Live Video Stream – Keep an eye on what's important to you from anywhere with the Kasa Smart App. Even stream live video to any Alexa or Google Assistant supported display, like a Fire TV, Echo Show or Chromecast
- Activity Zones – Control what alerts you receive by creating up to 4 custom activity zones, at no charge, around areas that are important to you. Set zones for areas that matter most like your front door, back door, garage, or living room
- Crystal Clear Video – Sharp and clear, wide-angle 1080p video makes sure you never miss a thing. Manually zoom in to get a closer look to what's going on. Even at night, the camera will detect activity with Night Vision
- Two-Way Audio – Use crisp 2-way audio to communicate with nosy roommates, family or even mischievous pets. Ask your roommates why they're in your room or tell your pets to stop chewing your favourite sneakers
- Protect Every Pixel – All your video streams are protected with industry-standard 128-bit AES encryption with SSL/TLS right from the camera

HD PAN/TILT WI-FI CAMERA With Night Vision

Although not part of Kasa Cam range, this stand alone camera still allows you to view live footage, record video and take snaps online using the tpCamera App.

- NC450 | 43160405
- 1280x720 @ 30fps HD max. resolution

HELPING MAKE YOUR HOME SAFER AND SMARTER

Want to automate your home? Not a problem! With Z-Wave, you can create a whole home network of devices that can be controlled all with one App.

Since we featured Z-Wave smart products in our newsletter mid last year, we've been impressed by the range of solutions available when it comes to building a smart network of devices for the home. So much so that we built our own display board to show our customers just how incredible these products are!

Utilising a Vera Home Controller, you can implement a variety of Z-Wave products to control your home security, monitoring power consumption of electrical appliances, even remotely switch on the lights when you're away from home.

So definitely come in-store to check out how it works, or jump online to have a look at the range of Z-Wave devices and solutions we have by visiting: <http://www.radioparts.com.au/zwave>

Come and demo it for yourself!

VERA EDGE HOME CONTROLLER

VERAEDGE | 09050214
Vera Edge gives you easy and powerful control over Z-Wave enabled lights, cameras, thermostats, door locks, alarm systems and more - compatible with over 1,200 Z-Wave devices. Featuring the latest Z-Wave Plus chipset - further, faster, more secure Z-Wave control.

VERA PLUS HOME CONTROLLER

VERAPLUS | 09050212
The Vera Plus can control smart devices together in groups or individually to create custom solutions that fit your life. View and control your system from anywhere. It has four wireless protocols built in (Wi-Fi, Zigbee, Z-Wave, and Bluetooth BLE), also a faster processor and more memory compared to the popular Vera Edge.

TERMS & CONDITIONS Product features and pricing in this newsletter are subject to change without notice. Special promotional prices advertised here are valid for the month the newsletter has been published. However, some offers may commence or extend beyond the length of the promotion. Availability and pricing of products are offered on a while stocks last basis. Most products have been photographed in-house and are identical to what you will receive, but manufacturers may make improvements during the life of a product without notice and this may result in a slightly different design. If certain product features are important, please contact our sales department for confirmation before ordering the product. Information presented in this newsletter has been checked and is believed to be correct at the time of printing, however, errors and omissions are excepted. Radio Parts can not guarantee prices, specifications, or features of a product that may change after printing. Radio Parts reserves the right to correct printing errors. *Device displayed to demonstrate purpose of product may not be included—please check with Radio Parts where unsure.
