4K 18GBPS HDMI LEADS

Pro2's 18Gbps HDMI leads support a high-bandwidth of 4K resolution 2160p@60Hz, nearly four times that of 1080p@60Hz, providing a spectacular quality in both video resolution and audio channels at any distance.

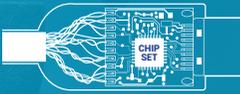

- ▶ Full 18Gbps bandwidth
- ▶ 48-Bit Deep Colour
- ▶ UHD 4K 2160p@60Hz
- ▶ HDR + ARC

HDMI 2.0 Active Optical Cable (AOC) is used to extend the transmission distance between HDMI source and sink devices (up to 200m). Using a hybrid cable, high-speed TMDS signals are sent through the Optical multimode fibres, while low frequency control signals are transmitted through the copper wires. HDMI 2.0 AOC is now compliant with TVs and Blu-ray players supporting 4K resolutions.

EACH MONTH ONE OF OUR STAFF RECOMMENDS ONE OF THEIR FAVOURITE PRODUCTS.

STAFF PICK

A trusted product from a trusted brand.

By **Damian Cranage** (Radio Parts Showroom Manager) –

Laser is a great brand we like for many reasons. Not only are they an Aussie company that produces great value products, but they also have a great service and support for our customers. So my pick for this month would definitely be the MMCB19 Android 4K Media Player.

It features a built-in HD digital tuner (with PVR recording functionality) which, when connected to your non-smart TV or projector, gives you smart functions! It also has Android v9 & other popular useful apps pre-installed, with the added bonus being able to install other player apps if required.

Up to 4K playback via HDMI output (and one of the few that still has composite AV out!). It supports an enormous amount of compatible media file types, and allows you to play movies or even record TV via USB (Memory Stick or Hard Disk Drive).

You can also connect it to a wireless PC USB keyboard & mouse for even more convenience, as well as use the included remote's mouse cursor function with direction pad.

With a quick and easy layout & navigation, and at a great price, you can't go wrong with this Media Player.
