

NEW ARRIVALS

Available Now!

Deliveries have been coming in non-stop with new lines that we're excited to share, including the WiiM Audio Streamers, Bowers & Wilkins 600 Series S3 and Yamaha's latest Network Hi-Fi Receivers & Soundbars.

Whether you're looking for a new way to stream your music, upgrade your home theatre system, or experience the best possible sound quality, we have something for everyone inside!

WiiM
 **YAMAHA**
Bowers & Wilkins

This isn't just another loudspeaker range. Bowers & Wilkins 600 Series S3: for the love of music.

The new 600 Series is the latest iteration of one of Bowers & Wilkins longest-running, most highly regarded and successful loudspeaker ranges. The Bowers & Wilkins 600 Series is designed for every music lover, providing them with an attainable and affordable way to experience the joys of True Sound. Featuring technologies used in their reference-standard 800 Series Diamond range found in Abbey Road Studios, the 600 Series is perfect for dedicated audiophiles, film fans, youthful vinyl devotees and even older buyers on a budget who want to get the most out of their listening experiences.

Available in Black, White, Oak & Red Cherry, they feature the acclaimed Continuum™ bass/midrange cone, an all-new Titanium Dome™ tweeter and upgraded speaker terminals derived from designs recently introduced in the acclaimed 700 Series range.

AUTHENTIC HI-FI QUALITY NEW

Click here to view the new Yamaha range on our website.

A new generation of Network Hi-Fi Receivers & Soundbars.

The way we listen to audio in our homes is rapidly evolving, but what has not changed is our need to connect to that audio in the most authentic and immersive way. The sheer quantity of available digital sources also continues to grow but at the same time audio lovers still want to enjoy legacy audio sources.

This is where Yamaha's next-generation of Network Hi-Fi Receivers & Soundbars come in. With options to suit any style or budget, Yamaha has got you covered.

We have the R-N2000A & the TRUEX50AC on display in our showroom, so why not drop in and experience the authentic Hi-Fi quality for yourself?

Bronze Series 6G - Made for you!

The new Bronze Series 6G from Monitor Audio is intricately engineered to optimise your listening experience. Whether you're enjoying your favourite album or watching the latest Hollywood blockbuster, the moment you take your first listen, you'll know the Bronze Series has been made for you.

Featured in all Bronze series models, Monitor Audio's C-CAM cone (Ceramic-Coated Aluminium/Magnesium) has a much higher resistance to bending stress than traditional cones and therefore exhibits much greater fidelity over their entire operating range. C-CAM tweeters and woofers share an audible consistency producing a smooth transition of frequencies and a sense of realism and cohesion in the soundstage.

Another unique feature of the series is the C-CAM Gold Dome tweeter. These tweeters are formed from a ceramic-coated aluminium/magnesium alloy, gold anodised to a specific thickness for ideal stiffness and damping characteristics. They are specifically designed for even sound dispersion, improved time alignment and a lower crossover frequency. Whether it's music or movies, a rich, detailed soundstage is created for a totally immersive experience.

INTEGRATE 2023 WRAP UP

INTEGRATE

in partnership with **infocomm**

30 AUG - 01 SEP | ICC SYDNEY

The Radio Parts team have returned from another successful year at Integrate in Sydney.

Integrate 2023 was a hugely successful event for Radio Parts, as we showcased our latest products and solutions in the AV and systems integration industry. Danny, Joe, Darren & our purchasing team were delighted to meet with many of our existing and potential customers, as well as network with other industry professionals and experts.

The team was also joined by Jonathan from T3 Innovations, who flew in all the way from Taiwan to help showcase T3's robust range of networking test equipment, tools, connectors and accessories.

We used Integrate to launch the all new Wintal MICRO4PRO Digital Signage Media Player. Compact and versatile, the MICRO4PRO is a giant leap forward from previous

models, not only now with upgraded 4K resolution, but with the added ability to manage content remotely and store content locally.

The player was really well received by everyone who had the chance to view a demo at the expo. We're excited to be able to bring something new into the digital signage space. Production is underway for our first shipment, so expect more on the MICRO4PRO in upcoming issues.

The guys were also incredibly excited to introduce the Wiim audio streamer range at Integrate this year. Wiim has released three models to choose from: the Wiim Mini, Pro and Pro Plus. These audio streamers are quickly becoming highly regarded amongst audiophiles everywhere, not only for their

outstanding performance & audio quality, but also for the wide range of music apps they support and affordable price point compared to many other audio streamers on the market. Check out our full introduction on page 6 to find out more about the new Wiim range.

All-in-all it was a great to see that so many in our industry continue to inspire with new technologies and innovative products. Some of which, we hope to have on our shelves soon, so you can see for yourself and be part of the real world innovation!

From the whole team at Radio Parts we would like to thank all the organisers, exhibitors, speakers, and visitors who made Integrate 2023 a memorable and rewarding event. We look forward to seeing you all at other events or at our Spencer Street showroom in 2024!

marantz® TRADE IN & CELEBRATE

The Best Audio Streamers for True Audiophiles.

There's a name everyone is talking about when it comes to ultra compatibility for high quality audio streaming: WiiM! Their models are quickly becoming highly regarded amongst audiophiles, not only for their outstanding performance and affordable price point, but also for the wide range of music apps they support.

The possibilities a WiiM Audio Streamer can offer are endless. Whether you want a compact stereo setup at home or a cost effective background music solution for a cafe, WiiM can be the centre of any environment. So come in-store or give us a call and we can work out the best solution for your needs. Pre-order your WiiM model from Radio Parts in October to take advantage of our introductory prices!

Play music everywhere with multi-room audio

Easily build your multi-room sound system with your existing AirPlay 2 speakers, Amazon Echo and Google Home devices.

Works with Voice Control

Use your favourite voice assistants -- like Siri, Alexa and Google -- to select music, control playback volume and more.

Automate your routines

Make life easier by automating your routines. Create a routine to wake up or fall asleep to your favourite music, station or podcasts.

Super easy setup

WiiM Pro will pop up automatically in the WiiM Home app. Follow the in-app guide and start streaming music in less than 2 minutes.

Stream Hi-Res audio

Supports up to 192kHz, 24-bit audio output. That's the same as an artist's recording in the studio.

WHOLE HOME MESH WI-FI SYSTEM

— By **Rob W.** (Sales Assistant)

The Deco M5 is the perfect solution for Wi-Fi range issues and dead-spots. With 4 internal antennas giving you 400 Mbps on 2.4 GHz and 867 Mbps on 5 GHz you can ensure high speeds on your wireless network anywhere in your home. A wireless mesh system allows you to roam throughout the house without concern for your connection lagging when swapping between access points, which you might find in a traditional system.

With quick and easy set up on the Deco app, it is effortless to build your new Wi-Fi network, as the app will guide you through every step of the process. Continued maintenance, including parental controls and speed testing can all be done from within the app.

This system is ideal for setting up a Wi-Fi network in a home residence. The ability to expand the network by simply adding another unit means any size of home can easily be covered.

Small commercial spaces can also benefit from this system, and there are more powerful options such as the Deco X20 for larger applications. In my experience the 2-pack is enough to cover an average suburban house in Melbourne but the 3-pack is also available for those larger houses,

Wi-Fi dead-spots are easy to cover with this system. You simply plug one unit into your router and the additional units will only need a power point to be able to receive and broadcast the signal anywhere you need. This allows you to bring Wi-Fi access to places where wiring for access points is difficult or impossible.

Overall, with its high speeds and ease of set up for the end user, the Deco M5 is a very effective tool for ensuring your Wi-Fi coverage doesn't drop out, no matter where in the house you are.
